Publication No. US20050112677A1
GENERAL INFORMATION:
APPLICANT: Samsung Electronics Co. Ltd.
TITLE OF INVENTION: A substrate having an oxide layer, method for detecting a target
TITLE OF INVENTION: Substance using the same and optical sensor containing the same
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Sequence 377399, Application US/10257017B Publication No. US20040241651A1 GENERAL INFORMATION:
